Flaky tests pass and fail on the same code without any change to the program under test. This study runs each test of 26 open-source Java projects one hundred times and records every outcome together with the order in which the tests ran.

Project	Stable	Flaky	Unclear
commons-lang$_{3.12}$	120$_{\text{run 1}}$	9$_{\text{run 1}}$	4$_{\text{run 1}}$
guava$_{31.1}$	198$_{\text{run 1}}$	25$_{\text{run 2}}$	17$_{\text{run 2}}$
jsoup$_{1.15}$	132$_{\text{run 2}}$	17$_{\text{run 2}}$	11$_{\text{run 3}}$
Total	450	51	32

The detector labels 450 of 533 tests as stable, 51 as flaky, and 32 as unclear. A manual check of the flaky tests confirms 47 of the 51 labels, and the remaining four tests depend on the system clock.
